**DETAILED ACTION**

1. In view of the appeal brief filed on March 14, 2006, PROSECUTION IS HEREBY REOPENED. Claims 1-25 and 33-40 are allowed.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

2. The following is an examiner's statement of reasons for allowance:

As the appellant pointed out in the Brief on p. 21:3-5, the prior art of record does not specifically teach or suggest that detail loops are used to allocate the vector memory references into plurality of temporary arrays, sized and located so that none of the vector memory references are cache synonyms. The following claimed features are not shown or suggested by the prior art of record: The combined steps in a method and apparatus for reducing cache thrashing, of distributing the vector memory references into a plurality of distinct detail loops configured to allocate the vector memory references into a plurality of temporary arrays, sized and located so that none of the vector memory references are cache synonyms.

These claim limitations are recited in each of the independent claims 1, 9, 17, 24, 25, 33 and 35; thus, all remaining claims are also allowed. The claimed invention reduces the likelihood of cache thrashing without requiring more banks of cache memory.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
